Computational Intelligence, Volume 12, Number 4, 1996

Computational Intelligence: An International Journal

Title Index, Volume 12

Title	Pages	Issue
Go-Moku Solved by New Search Techniques *L. V. Allis, H. J. van den Herik, and M. P. H. Huntjens*	7–23	12:1, 1996
Perfect Recall and Pruning in Games with Imperfect Information *Jean R. S. Blair, David Mutchler, and Michael van Lent*	131–154	12:1, 1996
Efficient Temporal Reasoning in the Cached Event Calculus *L. Chittaro and A. Montanari*	359–382	12:3, 1996
Constrained Resolution and Abductive Temporal Reasoning *Nicolas Chleq*	383–405	12:3, 1996
Validation of First-Order Rule-Based Systems *M. O. Cordier and S. Loiseau*	523–540	12:4, 1996
Interactive Semantic Analysis of Technical Texts *Sylvain Delisle, Ken Barker, Terry Copeck, and Stan Szpakowicz*	273–306	12:2, 1996
Pattern-Based Learning and Spatially Oriented Concept Formation in a Multi-Agent, Decision-Making Expert *Susan L. Epstein, Jack Gelfand, and Joanna Lesniak*	199–221	12:1, 1996
Knowledge-Based Feature Discovery for Evaluation Functions *Tom E. Fawcett*	42–64	12:1, 1996
Solving Nine Men's Morris *Ralph Gasser*	24–41	12:1, 1996
It's About Time: An Introduction to the Special Issue on Temporal Representation and Reasoning *Scott D. Goodwin and Howard J. Hamilton*	357–358	12:3, 1996
Temporal Reasoning With The Modal Logic Z *David E. Leasure*	406–421	12:3, 1996
General Game-Playing and Reinforcement Learning *Robert Levinson*	155–176	12:1, 1996
Localized Temporal Reasoning Using Subgoals and Abstract Events *Shieu-Hong Lin and Thomas Dean*	422–448	12:3, 1996
Computation of Best Bounds of Probabilities from Uncertain Data *Chengjie Luo, Clement Yu, Jorge Lobo, Gaoming Wang, and Tracy Pham*	541–566	12:4, 1996
Learning of Resource Allocation Strategies for Game Playing *Shaul Markovitch and Yaron Sella*	88–105	12:1, 1996
Learning Playing Strategies in Chess *Eduardo M. Morales*	65–87	12:1, 1996
Domain-Independent Temporal Reasoning With Recurring Events *Robert A. Morris, William D. Shoaff, and Lina Khatib*	449–476	12:3, 1996
On Temporal Deductive Databases *Mehmet A. Orgun*	235–259	12:2, 1996
A Strategic Metagame Player for General Chess-Like Games *Barney Pell*	177–198	12:1, 1996
Introduction to the Special Issue on Games: Structure and Learning *Barney Pell, Susan L. Epstein, and Robert Levinson*	1–6	12:1, 1996
Hypothetical Reasoning about Actions: from Situation Calculus to Event Calculus *Alessandro Provetti*	477–497	12:3, 1996
Recurrent Neural Networks and Finite Automata *Hava T. Siegelmann*	567–574	12:4, 1996
A Planning Approach to Declarer Play in Contract Bridge *S. J. J. Smith, D. S. Nau, and T. A. Throop*	106–130	12:1, 1996
A Strengthened Algorithm for Temporal Reasoning about Plans *Fei Song and Robin Cohen*	331–356	12:2, 1996
Event Tracking in a Dynamic Multiagent Environment *Milind Tambe and Paul S. Rosenbloom*	498–520	12:3, 1996

© 1996 Blackwell Publishers, 238 Main Street, Cambridge, MA 02142, USA, and 108 Cowley Road, Oxford, OX4 1JF, UK.

Learning Monotonic and Concave Interval Concepts Using the Back-Propagation Neural Networks 260–272 12:2, 1996
Shouhong Wang
On the Implementation and Evaluation of ABTWEAK 307–330 12:2, 1996
Qiang Yang, Josh D. Tenenberg, and Steven Woods
A Method for Computing All Maximally General Rules in Attribute-Value Systems 223–234 12:2, 1996
Wojciech Ziarko and Ning Shan
